Depending on the fullness selected the Easyfold system can be more economical than more traditional curtains (up to 33% compared to a regular pencil pleat curtain).

## WHAT MAKES THE FOREST EASYFOLD SYSTEM SO UNIQUE?

- » The smooth folding effect is always maintained whether the curtains are open or closed.
- » The system is designed so that the curtains maintain their folding effect from the moment they are dressed.
- » The simple, yet stylish design makes the curtains easier to make up.
- » The Easyfold heading stacks back neatly, taking up less space than traditional pleated headings.
- » The glider-cord is not visible when the curtain is fully closed.
- » UV resistant carriers, hooks, endcaps and tape ensure the longevity of this product.
- » Easy to take down and re-hang thanks to the detachable carrier-base in the Easysnap system.
- » Double Sided Carriers available in Easysnap option.
- » Can also be used in curved and bent tracks. Examples of how Forest tracks can be bent in different situations:

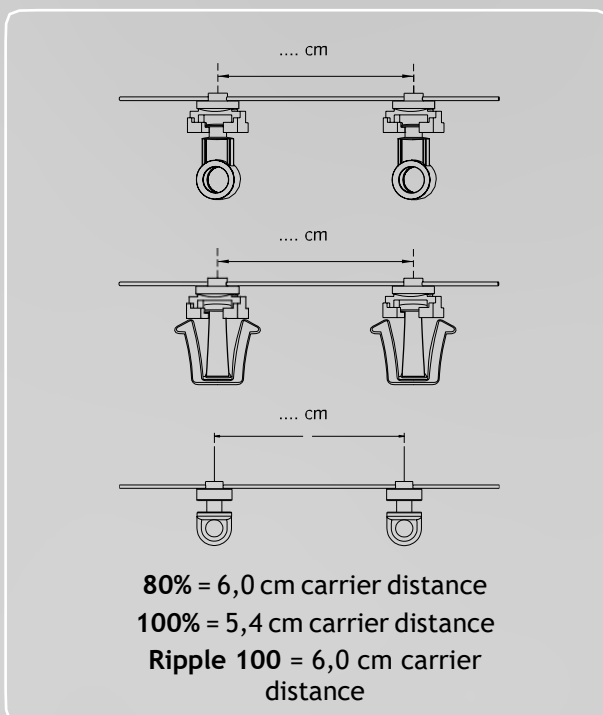

## EASYFOLD / EASYSNAP:

- » Metal snaps in tape are set at a fixed distance.
- » Interconnected gliders determine the fullness of the curtain available in 100% 2.2x fullness or 80% 1.8x fullness
- » Easysnap has a two part carrier and is easier to install. (Double sided carriers available.)
- » Easyfold carriers ensure the curtain does not break away from the track easily.

## RIPPLE 100:

- » 70mm transparent tape.
- » Tape secured to carriers with hooks.
- » Interconnected gliders (available in black or white) contained in the track limit the extension of the curtain fabric, creating a smooth and continuous folding effect.
- » Position of hooks are flexible allowing for manipulation of fullness and the space that the curtain takes up ie. when retro fitting into a pelmet.
